

KEERTHI T

Dallas, Texas | ✉ keerthit222@gmail.com

Summary

Business/Data Analyst with 3+ years of experience delivering enterprise analytics, BI reporting, and large-scale data integration with advanced SQL, Excel, and governed data practices. Skilled in clinical, financial, and operational data analysis with expertise in predictive modeling, regression, benchmarking, and KPI development. Hands-on with Snowflake, SQL Server, population health datasets, and Tableau dashboards supporting strategic decision-making. Proven ability to synthesize disparate datasets—including claims, encounter, and EHR-related data—to support quality, revenue cycle, and performance improvement initiatives. Strong communicator with a track record of presenting analytical insights to leadership.

Skills

- **Technical:** SQL, Tableau, Power BI, Advanced Excel, Access, Python, R, Snowflake, SQL Server, MySQL, PostgreSQL, Hive, Spark, AWS
- **Analytics & Statistics:** Regression, forecasting, hypothesis testing, risk modeling, trend analysis, feature engineering, clustering, classification
- **Reporting & Data Governance:** Metric definitions, data validation, UAT/QQA, audit trails, data quality assessment, reproducible analytics
- **ETL & Data Engineering:** Data transformation, SSIS, Snowflake pipelines, data lineage, ingestion workflows
- **BI & Performance Analytics:** KPI dashboards, cost/utilization analytics, clinical/operational reporting, variance and reconciliation analysis
- **Communication & Collaboration:** Stakeholder engagement, requirements gathering, strategic questioning, leadership presentations, cross-functional coordination

Education

Master of Science	<u>University of Texas at Dallas</u>	<i>Dallas, USA</i>	2021 - 2023
--------------------------	---	--------------------	--------------------

- Major in Business Analytics

Experience

Business Analyst	<u>Accenture</u>	<i>Dallas, USA</i>	07/2024 - current
-------------------------	-------------------------	--------------------	--------------------------

- Developed Tableau dashboards and Snowflake models integrating clinical, operational, and financial KPIs, reducing manual reporting by 80% and supporting quality and revenue cycle decisions.
- Executed SQL- and Python-based analyses of encounter, utilization, and population health datasets to identify patterns, validate metrics, and improve forecasting accuracy by 20%.
- Built automated reporting workflows in Excel/Power Query to enhance visibility of cost and performance trends by 35%, enabling leadership action.
- Applied regression and quantitative modeling to evaluate drivers of workflow efficiency and clinical/operational outcomes.
- Consolidated SQL Server, PostgreSQL, and Snowflake sources to improve data quality by 30% and strengthen reliability of CDI-related analytics.
- Presented analytical findings to senior leadership, improving alignment on documentation improvement and performance measures.

Business Analyst	<u>Deloitte</u>	<i>Dallas, USA</i>	09/2023 – 07/2024
-------------------------	------------------------	--------------------	--------------------------

- Automated SQL and Excel workflows for clinical and financial data validation, reducing processing time by 40% and improving reporting accuracy.
- Designed Tableau dashboards using Snowflake and AWS sources to monitor utilization, operational metrics, and quality outcomes.
- Conducted regression, scenario, and statistical modeling on high-volume datasets to reduce reporting errors by 15% and improve insight reliability.
- Generated validated extracts supporting audit readiness, risk modeling, benchmarking, and reproducible enterprise reporting.
- Automated Spark/Hive ETL pipelines with embedded data quality checks, reducing manual validation by 35%.
- Partnered with operational, finance, and technical teams to translate requirements into dashboards used for strategic planning and performance improvement.

Data Analyst	<u>HCL Technologies</u>	<i>Hyderabad, India</i>	04/2020 – 07/2021
---------------------	--------------------------------	-------------------------	--------------------------

- Cleaned, validated, and transformed financial, operational, and encounter-related data using SQL and Excel, improving data accuracy by 25%.
- Built Excel dashboards with automated visualizations to track utilization, performance metrics, and departmental KPIs.
- Supported ETL workflows using Hive, Spark, and SSIS to integrate disparate systems into Snowflake for standardized reporting.
- Developed Power BI dashboards using AWS-sourced data to monitor service metrics and workflow trends, improving reporting efficiency by 30%.
- Delivered client-facing reports and recommendations that improved data-driven decisions and operational efficiency

Certifications

- Google Data Analytics Professional certificate.
- Google Data Analytics Professional certificate.
